EDUCATION

Clark University **Worcester, MA**
MS in Information Technology *Graduation Date: May 2026*

- Relevant Coursework: Cloud DevOps and Automation, Information Systems Analysis and Design, Incident Response and Digital Forensics, Network Architecture and Design, Industry/Creative App Gen AI

WORK AND RESEARCH EXPERIENCE

Implementing Secure Key Management and Distribution in Cloud Environment (Research) **Oct 2023**
Research publication

- Developed a secure cloud key management scheme on AWS using threshold cryptography, improving computational performance by 3% and strengthening data security through distributed key shares.

eVoluteIQ **Remote**
Hyperautomation / Software Development Intern *Jun 2023 – Sep 2023*

- **Developed and deployed 8+ automation workflows on the eIQ hyperautomation** platform using low-code tools, reducing manual process handling **by ~30%.**
- Collaborated with cross-functional stakeholders to gather requirements and translate business needs **into automated solutions using RPA and workflow automation technologies.**

SoftTech Data Securities **Pune, India**
Jr. System Developer Intern *Nov 2020 - Apr 2021*

- **Developed** a web application for **detecting video tampering and morphing in CCTV footage** using deep learning and image processing techniques.
- Programmed and **implemented AI for image processing and deep learning** as a member of core artificial intelligence team.
- Coordinated with the web development team for the backend integration.

ACADEMIC PROJECTS

Criminal Face Identification System (Github) *June 2022*

- **Used split images and processed them** to match and identify the correct criminal pictures, **achieving an 85% accuracy rate** in facial identification.
- **Tested the system with local crime branch in Pune and university police** to integrate the system into existing workflows, resulting in faster **recognition of faces by 1.25x times.**

Data Leakage Detection System (Github) *Dec 2021*

- **Built a web app** to identify unauthorized access and ways data leaks happen in an organization.
- Conducted data analysis on enterprise-level datasets to detect patterns and potential risks related to data breaches.
- **Achieved 82% detection accuracy on testing data** while minimizing false positives, ensuring robust protection for sensitive data.

LEADERSHIP EXPERIENCE / CERTIFICATIONS

IEEE ICBDS Conference **New Raipur, IN**
Conference Presenter *Oct 2023*

- Co-authored and presented a research paper at an IEEE conference and received recognition and feedback from other researchers and industry professionals about the possible impact the project will have on current cloud platform.

Microsoft Certified: Azure Fundamentals **May 2025**
Certification number: MB558F-EF144A

SKILLS

Tools and Languages: AWS, Microsoft Azure, Python, JS, SQL, Tomcat, Git, Linux, Bash scripting

Frameworks: TensorFlow, Scikit-learn, OpenCV

DevOps: Terraform, Docker, Kubernetes, CI/CD, GitHub Actions
